FOREWORD

J. HUGO ARONSON
GOVERNOR

State of Montana
Office of The Governor
Helena

December 7, 1954

Mr. Albert Kruse
Commissioner of Agriculture
State Capitol
Helena, Montana

Dear Albert:

Please convey to Mr. P. J. Creer, Agricultural Statistician in charge of the Montana Office of the Agricultural Estimates Division of the Agricultural Marketing Service, the appreciation of Montana for such splendid cooperation between the United States and Montana Agricultural Departments. It has been helpful not only to your department, but to the other departments of the state and county governments.

This cooperation demonstrates how agriculture has become more and more dependent on national and international economic and political developments. The net result is that persons who are interested in the welfare of Montana and Montana's agriculture have to study it in the broad perspective of fast moving economic, political, scientific and technological changes.

Such detailed statistics as contained in this volume will be of immense value to those who want to help Montana in the march to progress. The State is growing in population and opportunity because its people have the spirit to keep it forging ahead.

Yours sincerely,

J. Hugo Aronson

Governor

PREFACE

The living standards and power of each country are measured by its natural resources, and its capacity to utilize these resources. America is favored with fertile soils and suitable climate for production of sufficient food and fiber for its populace and for many less fortunate people in foreign lands. A large volume of products can now be grown in this country under highly developed, mechanized methods by a relatively small portion of its population. This permits a larger percentage of its people to be engaged in other activities including more complete and improved methods of processing the raw goods produced by farmers and ranchers. American industries have demonstrated their production potentials during wartime when labor was scarce. Agriculture in this country was capable of meeting the needs of increased production under severe handicaps. Statistics relating to the country's greatest industry have been vital during peacetime as well as wartime periods.

The Agricultural Estimates Division of the Agricultural Marketing Service, United States Department of Agriculture is charged with the responsibility of assembling and publishing facts on agriculture. A wide variety of data relating to Montana and the United States are released in mimeograph form to the public by the agency office located in Helena. To meet the need for county and district data not available under the regular Federal program, this bulletin has been prepared under a cooperative agreement with the Montana Department of Agriculture. Funds appropriated by the thirty-third session of the Montana Legislature have made it possible to accommodate the numerous requests for more detailed information on Montana's agriculture.

CONTENTS OF BULLETIN

County crop and livestock statistics for 1952 and 1953 occupy much of this bulletin. A long-time series of county data relating to acreage, yield and production of winter wheat, spring wheat and all wheat are also featured. Since these bulletins have been published biennially, a two-year record of county data appears in each of the previous issues dating back to 1944. This issue contains State tables for 1952 and 1953 and similar tables for earlier years can be found in other volumes with a long-time series in the publication dated December 1946. Contents of this bulletin are as follows:

Climate Data, page 5, presents precipitation and number of frost-free days for selected county stations. The wide variation of these data between stations provides only an approximate comparison of the climate of one county with another county.

Varieties of Wheat Grown in Montana, page 6, shows the prominence of Thatcher as a hard red spring variety and how it has gained over Ceres and Marquis varieties since 1939. In the hard red winter class, Yogo is a strong leader and with Karmont, has largely replaced the Turkey variety which was dominant ten years ago.

Cash Receipts, page 7, reflect decreases in the income of Montana farmers and ranchers from the high 1951 level when prices of cattle, sheep and wool were at all-time peaks. Cash values of agricultural products used on farms and ranches are not included in the figures. Cash receipts by counties, pages 8 and 9, point up substantial increases of receipts from crops in 1953 for several north central and northeastern counties which produced unusually large crops of wheat and other grains.

All crops, acreage and value of crop production, page 7, illustrates the importance of irrigation to Montana's agriculture. Sharply reduced prices for potatoes and hay in 1953 are chiefly responsible for the lower value per acre of irrigated crops that year. Conversely the value per acre of non-irrigated crops was relatively high as a result of the favorable season for dry land crops.

Montana Crops and Livestock During 1952 and 1953, pages 10 and 11, summarizes factors affecting crop production and livestock marketings. The year 1953 will be remembered for the all-time record wheat crop and the largest cattle inventory ever recorded at the year's end.

State Crop Tables, pages 12 and 13, contain total, irrigated, and non-irrigated data for the years 1952 and 1953. Crops grown entirely on irrigated land or on non-irrigated land are so indicated by appropriate footnotes.

State Livestock Tables, pages 14 and 15, cover January 1 inventory numbers and values for 1953 and 1954, production, disposition and income data for 1952 and 1953. Inventory numbers are listed by age and sex groups for each kind of livestock.

County Crop Tables, pages 16 to 45, present 1952 and 1953 acres planted and harvested, yield per acre, production and value for the total crop, acres harvested and yield per acre separately for irrigated and non-irrigated land. Unless crop production is significant, the counties with small amounts are omitted from the tables.

County Livestock Tables, pages 46 and 47, list the January 1 inventory numbers of the principal livestock and poultry for the years 1952, 1953 and 1954. The 1954 inventory is tentative and subject to revision.

County Wheat Tables, pages 48 to 103, supply a record of acreage, yield and production of winter wheat, spring wheat and all wheat for the years 1919 to 1943. This series of wheat data have served many needs including the development and conduct of acreage control and marketing programs.

VARIETIES OF WHEAT GROWN IN MONTANA

The constant shift in the varieties of wheat grown in Montana is evident from chronological data appearing in the table below. Hard red spring wheat is grown generally throughout the State, but its concentrated in north central and northeastern portions. Thatcher, Ceres and Rescue are the leading varieties grown in the principal producing areas. Marquis, and Pilot varieties, while also common to all parts of the State, are popular in western and southern portions. Hard red winter is grown principally in the western two-thirds of the State and in some southeastern counties. Most of this is comprised of four varieties, Yogo, Karmont, Turkey and Newturk. However, the Wasatch variety of hard red winter wheat is popular in western and southern areas.

Percentage of the Total Wheat Area Occupied by the Varieties of Wheat Grown in Montana at 5-year Intervals Since 1929, and the Acreage in 1949 and 1954

CROPS AND LIVESTOCK IN MONTANA DURING 1952

Crops—Total crop production in 1952 was slightly less than the preceding year and the average of the previous decade. However, the acreage harvested of all crops at 9,365,900 acres was a record high, one-half of one percent above the previous high year of 1951 and 16 percent above average.

The 1952 crop season opened early with good supplies of soil moisture, and seeding was completed with a minimum of delay. However, precipitation during the growing season was only about 75 percent of normal, resulting in dry conditions over much of the State. Rainfall during May and June was very short and dry land crops in Eastern Montana germinated with thin stands and developed poorly. Irrigation water was short in several areas. Unlike the two previous seasons, the weather at harvest time was very favorable and crops were taken from the fields earlier than usual and with a minimum of loss.

Montana's 1952 wheat crop of 83.5 million bushels was one-eighth smaller than the record high 1951 production, but 15 percent above the preceding 10 year average. Spring wheat production was about 18 percent below 1951 and one-fifth less than the high point reached in 1950. Drought conditions in the eastern and northern sections resulted in reduced yields. Production of winter wheat in 1952 was slightly larger than the year before, but the acreage harvested was one-fifth greater. Winter kill was light, but yields were down because of the dry summer.

Production of oats and barley was a little above 1951 crops as a result of increased acreage. A shift in barley acreage from the dry eastern section farther west contributed to an increase in yield. The average yield of oats was a little lower than the previous year.

An estimated 2.6 million tons of hay was produced in 1952. Yields in the western half of the State were good, but dry conditions in the eastern third resulted in poor yields on non-irrigated land.

Flaxseed acreage continued to decline and production was the lowest since 1937. Yields were higher than in 1951. Mustard seed production was nearly one-fifth smaller than the previous year. A 40 percent reduction in acres harvested was partly offset by bumper yields.

Production of alfalfa seed was nearly one-third larger than the year before as a result of increased yields. Crested wheatgrass seed production, however, was considerably smaller as much of the acreage was used for pasture.

Potatoes, dry beans, seed peas and sugar beets all did very well in 1952 under irrigation. Harvesting conditions were ideal. A lack of soil moisture limited corn development with only a small part reaching maturity.

The cherry crop was a record high and apple production was much improved over the previous two years.

Livestock—The cattle population in Montana increased 4 percent during 1952. At the close of the year the inventory totaled 2,152,000 head. Prices dropped sharply the last few months causing many ranchers with adequate feed to delay marketing in hopes of a price recovery. Range feed and hay were short in the dry eastern third. Marketings were slightly above 1951.

Sheep and lambs numbered 1,791,000 head at the close of 1952, a decline of about 4 percent from the beginning of the year. A strong downturn in prices contributed to the decrease in population. The lamb crop was larger than in 1951.

Hogs on farms on January 1, 1953 totaled 130,000 head, a decline of nearly one-third from the beginning of 1952. Horse numbers dropped about 8 percent, and the chicken population was about 6 percent smaller.

CROPS AND LIVESTOCK IN MONTANA DURING 1953

Crops—Total production of crops in 1953 attained a record high volume, nearly one-fourth larger than the 1952 harvest and 22 percent above the average for the preceding decade. The acreage harvested, however, was only 6 percent greater than a year ago.

The 1953 season opened normally, but heavy precipitation in May and June delayed seeding in northern and eastern sections. Planting was not completed until late June. Favorable summer growing conditions and a long, dry fall permitted maturity of these late crops, and resulted in a bounteous harvest.

Wheat production in 1953 was by far the highest of record. At 114.2 million bushels, the harvest was one-fifth larger than the previous record crop produced in 1951 and more than a third greater than the 1952 crop. Production of spring wheat was over half again as large as in the preceding year, although the acreage harvested was only one-tenth higher. Favorable moisture conditions in major producing areas resulted in an increased yield. The winter wheat crop was slightly smaller than the year before. Much reseeding to spring wheat was necessary because of the dry fall and winter of 1952-53.

Total production of oats and barley in 1953 was slightly above 1952 crops, primarily because of increased acreage. Hot, dry weather during July slightly reduced the barley yield.

Production of all hay totaled nearly 3.1 million tons in 1953, a 17 percent increase over the previous year. Yields were higher in northern and eastern sections because of increased moisture supplies.

Flaxseed production jumped over 300 percent from 1952, as a result of expanded plantings. The quantity of mustard seed harvested was about half of the previous year's production.

Both acreage and yields of alfalfa and clover seeds were reduced in 1953. Frost damage, the need for hay and low seed prices contributed to these declines. Crested wheatgrass seed production increased sharply.

The corn crop increased over 70 percent from the previous year due to abundant moisture supplies.

Most irrigated crops achieved excellent production, but very hot July temperatures damaged non-irrigated seed peas in Flathead County.

Cherry production continued high in 1953, but spring frosts limited the apple crop.

Livestock—Cattle and calves on Montana farms and ranches numbered 2,281,000 head on January 1, 1954, an increase of 6 percent during 1953. Prices continued downward most of the year, but began an upturn in November. Even though marketings were slightly above 1952, many ranchers with sufficient feed held stock into 1954 in anticipation of a strengthening price. Range feed and hay supplies were ample except in the southwestern portion.

The sheep and lamb inventory totaled 1,749,000 head at the close of 1953, indicating a decline of 42,000 head during the year. A gradual price decline during the first 10 months encouraged reduction of numbers. The lamb crop was virtually unchanged from the year before.

The hog population dropped 22 percent in 1953, with an inventory of 101,000 head, at the close of the year. The number of horses declined 7 percent, and chickens on farms were reduced 3 percent.

	1953	185	12	164	46	42,006	8,244	10,143

[1]/ Calf crop for cattle; lamb crop for sheep, pig crop for hogs.
[2]/ Excludes interfarm sales.
[3]/ Live weight.
[4]/ Includes receipts from marketings and from sales of farm slaughtered meat.

LIVESTOCK PRODUCTS, 1952 and 1953

Amount Produced, Value of Farm Production and Income

	1952	1953
WOOL PRODUCTION AND INCOME		
Number of Sheep Shorn	1,605,000	1,573,000
Wool Production: Per Fleece, lb.	9.7	9.7
Total, lb.	15,568,000	15,258,000
Price per lb., ct.	60	60
Cash Income, dol.	9,341,000	9,155,000
CHICKEN PRODUCTION AND INCOME		
Amount produced, lb.	12,848,000	11,906,000
Amount sold, lb.	9,379,000	8,312,000
Price per lb., ct.	25.2	27.1
Cash Income, dol.	2,364,000	2,253,000
Gross Income, dol.	3,359,000	3,286,000
CHICKEN EGG PRODUCTION AND INCOME		
Number of eggs produced, doz.	21,167,000	21,083,000
Number of eggs sold, doz.	16,583,000	16,500,000
Price per doz., ct.	39.7	44.0
Cash Income, dol	6,584,000	7,260,000
Gross Income, dol.	8,370,000	9,240,000
TURKEY PRODUCTION AND INCOME		
Amount produced on farms, lb.	2,282,000	2,363,000
Amount sold, lb.	2,135,000	2,142,000
Price per lb., ct.	34.7	31.5
Cash Income, dol.	741,000	675,000
Gross Income, dol.	809,000	739,000
HONEY AND BEESWAX PRODUCTION AND VALUE		
Colonies of Bees	62,000	66,000
Honey Production, lb.	5,146,000	5,742,000
Price of honey, per lb., ct.	14	14
Value of honey produced, dol.	720,000	804,000
Beeswax production, lb.	93,000	98,000
Price of beeswax, per lb., ct.	42	41
Value of beeswax produced, dol.	39,000	40,000
MILK AND MILK PRODUCTS, QUANTITY AND INCOME		
Number of milk cows on farms (average during year, heifers not freshened excluded)	103,000	103,000
Production per milk cow: Milk, lb.	4,980	5,140
Milkfat, lb.	192	198
Percentage of fat in milk, percent	3.85	3.85
Total production on farms: Milk, lb.	513,000,000	529,000,000
Milkfat, lb.	20,000,000	20,000,000
Butter churned on farms, lbs.	1,400,000	1,300,000
Milk used on farms where produced, total, lb.	110,000,000	108,000,000
Fed to calves, lb.	20,000,000	21,000,000
Consumed as fluid milk or cream, lb.	59,000,000	58,000,000
Used for farm-churned butter, lb.	31,000,000	29,000,000
Milk marketed by farmers, total, lb.	403,000,000	421,000,000
Delivered to plants and dealers: As whole milk, lb.	165,000,000	180,000,000
As farm skimmed milk, lb.	208,000,000	213,000,000
Retailed by farmers as milk and cream, lb.	30,000,000	28,000,000
Average cash returns from marketings: Per 100 lb., milk, dol.	3.98	3.74
Per lb. milkfat, dol.	1.03	.97
Milk sold to plants and dealers: Quantity, lb.	165,000,000	180,000,000
Price per 100 lb., dol.	4.49	4.45
Receipts from sales, dol.	7,408,000	8,010,000
Cream sold to plants and dealers: Quantity of milkfat, lb.	7,740,000	7,920,000
Price per lb. fat, ct.	75	64
Receipts from sales, dol.	5,805,000	5,069,000
Milk and cream retailed by farmers: Quantity sold, milk equiv., qt.	14,000,000	13,000,000
Price per qt., ct.	20.2	20.4
Receipts from sales, dol.	2,828,000	2,652,000
Cash receipts from marketings of all milk and cream, dol.	16,041,000	15,731,000
Gross farm income from dairy products, dol. [1]	19,623,000	18,985,000
DAIRY PRODUCTS MANUFACTURED, QUANTITY		
Creamery Butter, lb.	5,962,000	6,634,000
American Cheese, lb.	2,811,000	4,005,000
Cottage Cheese, Creamed, lb.	1,143,000	1,175,000
Ice Cream, gal.	3,020,000	2,699,000
Ice Milk, gal.		293,000

[1] Cash receipts from marketings plus value of milk used for farm consumption and farm butter churned.

FOREWORD BY THE GOVERNOR ... 2

TEXT

Preface ... 3
Contents of Bulletin ... 3, 4
Montana Crops and Livestock During 1952 and 1953 ... 10, 11

CLIMATE DATA—Selected Stations, 1952 and 1953—Table ... 5

VARIETIES OF WHEAT Grown in Montana, Text and Table ... 6

FARM INCOME—Tables ... 7, 8, 9

IRRIGATED ACRES and Their Production Value—Table ... 7

NON-IRRIGATED ACRES and Their Production Value—Table ... 7

STATE AND COUNTY STATISTICS

Grain Crops

Barley ... 12, 13, 26, 27
Corn ... 12, 13, 22, 23
Oats ... 12, 13, 24, 25
Rye ... 12, 13, 43
Wheat, All ... 12, 13, 48 to 103
Wheat, Spring ... 12, 13, 20, 21, 48 to 103
Wheat, Winter ... 12, 13, 18, 19, 48 to 103

Hay and Forage Crops

Alfalfa Hay ... 12, 13, 34, 35
All Hay ... 12, 13, 32, 33
Wild Hay ... 12, 13, 36, 37

Other Crops

Beans, Dry ... 12, 13, 44
Flaxseed ... 12, 13, 28, 29
Peas, Dry ... 12, 13, 44
Potatoes ... 12, 13, 30, 31
Seed, Alfalfa ... 12, 13, 38, 39
Seed, Crested Wheatgrass ... 12, 13, 42
Seed, Mustard ... 12, 13, 41
Seed, Red Clover ... 12, 13, 40
Seed, Sweet Clover ... 12, 13, 40, 41
Sugar Beets ... 12, 13, 45

Fruits

Apples ... 12, 13
Cherries ... 12, 13

Livestock

Bees ... 15
Cattle, Total ... 14, 47
Milk Cows ... 14, 15, 47
Hogs ... 14, 46
Horses and Mules ... 14, 46
Sheep and Lambs ... 14, 47

Livestock Products

Dairy Products From Farms ... 15
Dairy Products Manufactured in Montana ... 15
Honey and Beeswax ... 15
Milk Production ... 15
Wool Production ... 15

Poultry and Poultry Products

Chickens ... 14, 46
Eggs ... 15
Turkeys ... 14
